# BIG MAC

## PURE ENGLISH

Pure Warnham son of Clive from the very potent Ramesses hind 079.

Big Mac produced super heavy weight velvet at a very young age and passed this on to his progeny.

He cut 11.75kg as a 10 year old and now when grown out to hard antler has produced a massive head of 293 CIC with a main beam of 36 cm. If accepted by CIC this would be a world record.

Antler of this magnitude is very rare and must surely position Big Mac among the super elite in the industry.
