Sire Performance Data

AGE LW Antler Gr Score

| | | | | |
|---|-------|---------|----|------------------------------------|
| 1 | 115kg | | | |
| 2 | | 7.48kg | HA | |
| 3 | | 13.55kg | HA | 456 ² / ₈ MI |
| 4 | | 14.00kg | HA | 481 ³ / ₈ MI |
| 5 | | 19.65kg | HA | 502 ⁶ / ₈ MI |

Sebastian is an excellent example of the Furzeland potency.

Very multi pointed tops with exceptional beam. He has cut the heaviest antler weight for age for the past 3 years.

His 5 year old head weighed an incredible 19.64kg (two days after cutting) and had scored 502 ⁶/₈ MI.

The imbalance to his antler, shown clearly in this photo, was due to a leg injury. Tragically Sebastian broke this leg after the roar. His unaffected left side scored 100 inches more than the right. We can only imagine what a great score it would have been had he not had this injury

Although he has made a partial recovery progeny will only be available by AI in the future.
